SUMMARY

Versatile and highly motivated Full-Stack Developer with over 3 years of hands-on experience in designing, developing, and deploying scalable web applications. Specialized in React.js, Node.js, Express, NestJS, PostgreSQL, and MongoDB. Adept in both frontend and backend development, with a strong grasp of clean code principles, performance optimization, and team collaboration in Agile and remote-first environments.

Proven ability to deliver user-friendly, responsive, and high-performing digital solutions in domains such as ERP systems, e-commerce, dashboards, and internal business tools. Passionate about solving real-world problems through technology and eager to contribute to meaningful projects.

skills

Frontend: React, Next.js (SSR/SSG/ISR), Tailwind CSS, shadcn/ui, Material UI

State & Data: Redux / Redux Toolkit, React Context, REST & GraphQL integrations

Backend: Node.js, Express.js, NestJS, PostgreSQL, MongoDB

Testing & QA: Jest, React Testing Library

Testing & DevOps: Postman, Docker, CI/CD, Heroku, Git

DevOps & Tools: Docker, CI/CD, Heroku, Vercel, Postman, Git

Practices: Performance optimisation, accessibility, SEO, component-driven design

WORK EXPERIENCES

FULLSTACK DEVELOPMENT
BIGFIX

January 2025 – Date

- Lead full-stack development efforts using MERN and PERN stacks.
- Build scalable backend systems with Express.js and NestJS, following best practices in modular architecture.
- Design efficient relational and non-relational database structures with PostgreSQL and MongoDB, ensuring optimized queries and secure data handling.
- Create dynamic and maintainable frontend interfaces with React.js, incorporating Redux and Context API for robust state management.

- Conduct unit and integration testing using Jest, Supertest, and Postman to uphold application reliability.
- Participate in Agile ceremonies, including sprint planning and retrospectives, and manage deployments via Docker, Heroku, and CI/CD pipelines.

FRONTEND ENGINEER
June 2025 - Date

STEADFAST INTERNATIOAL

- Develop and maintain intuitive, responsive UI components using React.js, Tailwind CSS, and Material UI.
- Collaborate with cross-functional teams including UI/UX designers, product managers, and backend developers to deliver feature-rich web applications.
- Integrate RESTful APIs and implement client-side logic for seamless user experiences.
- Ensure high code quality through component testing, code reviews, and performance profiling.

FRONTEND DEVELOPMENT
January 2024 - July 2024

EBIS

- Created Interactive Data Visualizations: Designed dynamic charts and graphs using .Re Charts, enabling clear and visually compelling data representation for users.
- Enhanced Web Performance: Optimized application performance through advanced React.js techniques, ensuring fast load times and seamless user experiences across all devices.
- Responsive and Engaging UI Development: Built user-friendly, responsive layouts using HTML, CSS, and JavaScript, ensuring a smooth and visually appealing experience across browsers and devices.
- Implemented Interactive Features: Leveraged React.js to add dynamic, interactive elements and animations, enhancing application functionality and user engagement.
- Collaborated on End-to-End Development: Partnered with UX/UI designers to translate wireframes and mockups into fully functional web pages, combining creativity with technical expertise to deliver polished, real-world applications.
- Ensured Cross-Browser Compatibility: Debugged and tested applications across multiple browsers, guaranteeing flawless functionality and a consistent user experience for diverse audiences.

PROJECTS

BudgetIQ – AI-Powered Financial Management Platform
[Live Demo](#)
Built with Next.js and Shadcn UI, BudgetIQ helps users manage finances through real-time dashboards, AI receipt scanning, and automated budgeting alerts. Key features include:
- Secure user authentication and dynamic account/transaction management
- Advanced data visualization and AI-driven receipt parsing
- Cron-based budget notifications
- Continuous deployment via Vercel

PharmarX Marketplace – Full-Stack E-commerce Platform
[Live Site](#)
Robust e-commerce application using React.js, Node.js, Express, and MongoDB. Key functionalities:
- User auth, product filtering, shopping cart, and secure checkout
- Backend optimized for performance and scalability
- Focused on trust, accessibility, and seamless user experience

Q & M Oil and Gas Solutions Website
[Live Site](#)
Corporate website built using HTML5, CSS3, JavaScript, and tailwindcss to enhance online visibility, with:
- Clean navigation, responsive layout, and fast-loading pages
- Optimized for SEO and mobile experience

Megaexe ChatApp – Real-Time Messaging Platform
[Live Demo](#)
Engineered a secure chat application with MERN stack and Socket.IO, incorporating:
- Real-time two-way messaging and user presence updates
- PostgreSQL-backed message storage and secure auth flow
- Modular codebase designed for scalability and deployment readiness
